Roger™ – your preschooler's new best friend

More words

Did you know that your child needs to hear **45 million words** to be ready for school?[1] A remote microphone system can expose your preschooler to up to 11 more words per minute ... that's approximately **5,300 extra words per day!**[*2]

*Compared to using hearing aids alone. Based on average hearing aid use time of an 8-hour day.

More conversations

Once mobile, access to speech coming from a distance is more challenging. When using the Roger system, parents **speak more** to their children **from a distance.**[3]

More responsiveness

Based on parent responses to the FM Listening Evaluation Questionnaire, while using the Roger system...

80% of families report **greater responsiveness**

35% report **less frustration** in their children[3]

PHONAK
life is on

There's a magical playroom at school which Leo likes to sneak into from time to time. No one knows that he can make the toys come alive and make beautiful sounds. Leo's always careful when he plays with his magical toys, because he knows that the loud sounds they make could damage his hearing.

Help Leo to color in his toys with your favorite colors and use the Quiver app to make them come alive! Share your creation on social media using #coloringleo
