

Phonak Lyric™ relieves tinnitus faster than standard hearings aids.¹

An estimated 10–15% of a population has tinnitus but most cases go untreated.² This is due to a lack of information and the fact that most people are unaware of who will understand their complaints or assist them. While some cases are minor, some require more specific treatment to overcome possible long term effects.

Although there is no cure for tinnitus, you'll be relieved to know that there are various effective forms of counseling and treatments available. Once you decide to seek help the first step is to speak to a tinnitus specialist near you for more in-depth information. Tinnitus is something that can be present 24 hours a day and amplification is one option to alleviate tinnitus.

The Lyric effect

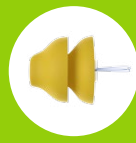

Reduces tinnitus annoyance faster than daily wear hearing aids¹

Lyric is a valid choice as part of your tinnitus management program³

Improves sleep quality¹

Benefits of Lyric:

- ▶ 24/7 amplification
- ▶ 100% invisible
- ▶ Clear, natural sound
