Cart Issues – Troubleshooting Guide

The 'Proceed to Checkout' button is not displaying on my cart page?

There are a variety of reasons why this issue can happen. The most common reason is because a product may not have been ordered correctly. In this example, the cShell earpiece has not been configured. In this case, click the 'Configure' button to complete configuration and this should resolve the issue and the 'Proceed to Checkout' button will now be visible.

	Phonak Mini Charger Case Material #075-3009		AUD95.00	<input type="text" value="1"/>	AUD95.00	
	cShell 4.0 Acryl Material #062-0008-01 Configure, Side: Left, Shell: Pink, Faceplate: Pink		AUD95.00	<input type="text" value="1"/>	AUD95.00	
	cShell 4.0 Acryl Material #062-0008-01 Configure, Side: Right	 	AUD95.00	<input type="text" value="1"/>	AUD95.00	
	TV Connector [®] Material #076-3006-08		AUD180.00	<input type="text" value="1"/>	AUD180.00	
					List Price	AUD8,606.00
					Sales Tax	AUD0.00

My pricing information is not displaying in my cart?

If you are receiving this pop-up and are not able to view pricing, it could be because you have a product in your cart that may not be configured correctly.

For example, you must configure each earpiece separately. If you need two of the same configuration, you are unable to configure the first one and then update the quantity to '2' in your cart. You must configure the second earpiece also then add it separately to the cart. Otherwise it will cause this issue.
