

Phonak e-Store Ordering via Target Software

August 2019

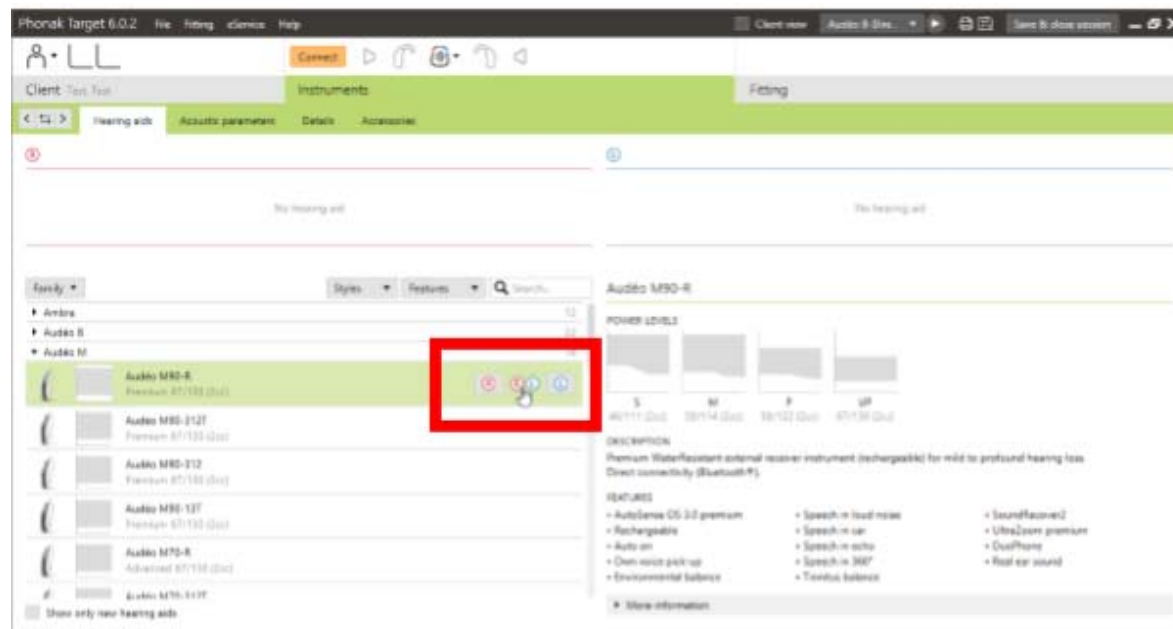

A Sonova brand

PHONAK
life is on

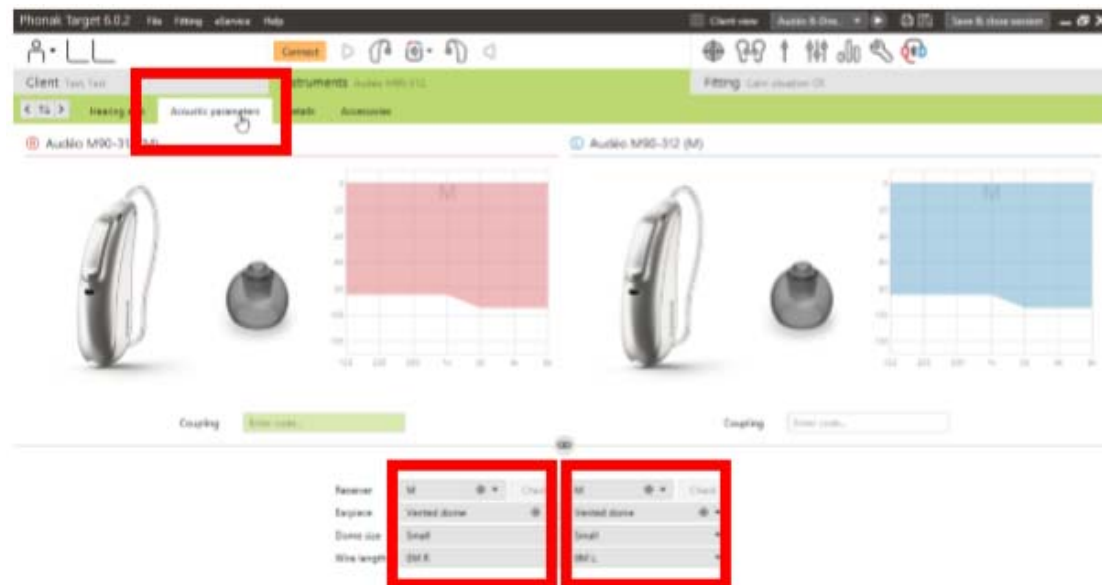

- Currently RIC/BTE devices including their configuration can be successfully added to the eStore cart via the Target software.
- If an audiogram exists for the client, it will also transfer to the eStore.
- **Please Note:** Customer devices, moulds/domes or receivers **cannot be added** via Target. These can be added to the order via the eStore.

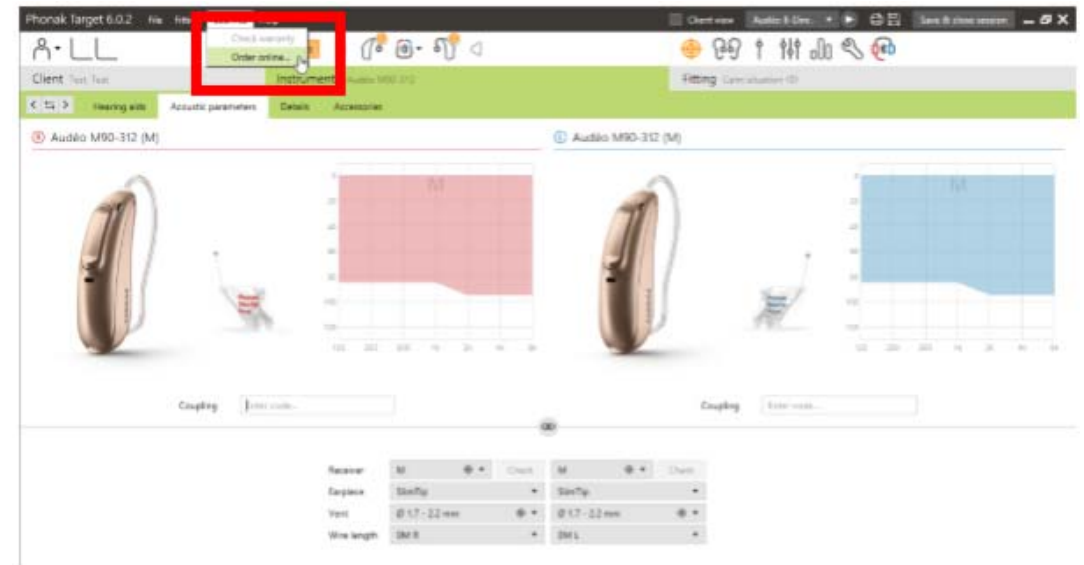

- Begin by opening & selecting the desired patient or create a new patient. Then click on new session or open session depending on the situation.
- Once the session opens click on 'Instruments' across the top and click the 'Hearing Aids' tab and select the desired hearing aid family to access the additional options.
- After selecting the model, indicate the side, right, both or left.

- Next select the 'Acoustic Parameters' tab across the top to select the desired housing colour.
- **Please note:** At this time the options for the receiver, earpiece and wire length cannot be selected here.

- Next select 'eServices' across the top menu, then select 'Order Online'.
- When the order online window opens, click on 'Configure in eStore'.
- Devices will now be copied into the eStore cart including the device configuration performance level and colour.
- Receivers & domes/moulds will need to be added separately to the cart in eStore.

- Continue by adding your clients first and last name.
- Now click on 'Compatible items' to add additional compatible items, receivers and domes/moulds.
- Return to the cart 'Proceed to Checkout'.
