Fast Facts

Phonak CeruShield Disk

What is it?

Phonak CeruShield™ Disk is the new wax system from Phonak designed as an easy to use dispenser wheel.

The CeruShield Disk consists of :

- 8 new CeruShield filters
- 8 positions for easy disposal of used wax filters

CeruShield filters protects the receiver from wax related problems and offers clients longer wearing time between filter changes. **CeruShield filters have been designed specifically to be used with the SDS 4.0 receivers.**

Why use it?

Benefits for you:

- Reduced maintenance concerns

Benefits for your clients

- Longer wearing time between wax filter changes
- Less time spent on device maintenance
- Easy handling

How to use it?

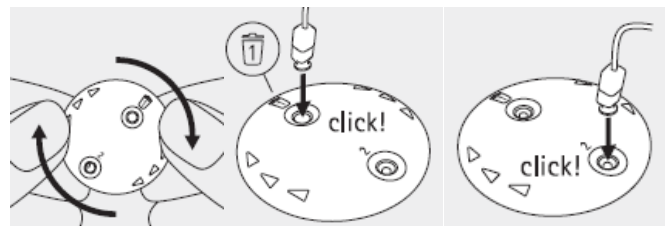

RIC hearing aids fit with domes

- CeruShield filter for the receiver

RIC hearing aids fit with custom ear pieces have double wax protection:

- CeruStop filter for the custom tip
- CeruShield filter for the receiver

Please note that Phonak CeruShield is only compatible with Phonak SDS 4.0 Receivers and is NOT compatible with older receivers.
