# Naída S

Believe in the power to hear more

**PHONAK** life is on

## More hearing

Children need to be able to discover all the sounds that make up their world. Two features that contribute to exceptional audibility and aim to support a child's development are SoundRecover and WhistleBlock.

### Breakthrough in audibility

Significant hearing loss is often associated with poor high frequency hearing. The unique SoundRecover feature enhances audibility of essential high pitched sounds beyond those available with conventional amplification. It aims to amplify previously inaudible sounds, such as important speech sounds, bird song and door bells.

### No whistling, more sound

WhistleBlock effectively eliminates feedback (whistling) whenever it occurs, so children can benefit from increased amplification, wherever they are, whatever they do.

### Future-proof

The Naída S performance grows with children's needs. It offers sophisticated features, such as directional microphones for better hearing in background noise and automatic functionalities that adjust continuously as the listening situation changes.

## More access to the world of wireless communication

Enjoying life means having the freedom to connect to the world of communication. Naída S, with its wireless and hands-free solutions, lets a child explore new horizons.

### Dynamic FM bridges the gap

Dynamic FM provides exceptional clarity when children need to communicate across distances or in noisy and echoey environments. It is ideal at home, in the car, in day-care, in the classroom and in many more situations central to everyday life.

### Opening up the world of wireless communication

iCom is the ideal Bluetooth companion for children in the world of communication. It interfaces with a diverse range of devices like telephones, computers and MP3 players.

### Phonak TVLink

Children love TV and this dedicated Phonak TV solution offers an exceptional listening experience. With Phonak TVLink, it is easy to connect the hearing aids to the TV via Bluetooth. The unique StereoSound ensures excellent sound quality.

## More dependability, safe design

Children being children means that reliability is crucial, so they can participate in fun activities without compromising their hearing abilities.

### WaterResistant

The best test of dependability is in the day to day wearing of an instrument and Naída S has the advantage of a housing that has withstood the test of time. Countless children have enjoyed the freedom provided by the unique resistance to water and dirt.

### Safety first

A tamper-proof battery lock prevents young children from accessing the battery.
