Small moderate power micro Petite BTE, battery size 10 (for fitting range, product details, and available options, please see "Versáta Art Product Information" or visit www.phonakpro.com).

Versáta micro Petite devices do not have wireless functionality but support remote controls like KeyPilot2 and WatchPilot2.

Unless otherwise specified, all data obtained are measured in a closed configuration with a straight measurement micro tube (Art. No. 004-1393) and a coupling disc (Art. No. 002-0412) onto a HA-1 coupler (ANSI-S3.7-1995) or an occluded-ear simulator (EN 60711, coupling arrangement according to fig. 4 in the test standard), and in the iPFG measurement settings. For further information refer to the Fit'nGo micro Kit instructions.

Note: Measurements with pure tones of a digital hearing instrument can result in a wavy frequency response. This is an artifact resulting from the use of a narrowband input signal and does not reflect the actual performance with naturally occurring broadband input signals.
