Phonak Sky Q

Phonak Sky Q-RIC (Q90/Q70/Q50) (xSP plus)

WaterResistant Receiver-In-Canal (RIC) instrument with size 13 battery (for fitting range, product details and available options, please see the Product Information or visit www.phonakpro.com)

Phonak Sky Q-RIC instruments can be fitted with a SuperPower plus (xSP plus), Power (xP) or Standard (xS) xReceiver. The SuperPower plus xReceiver (xSP plus) is for moderate to profound hearing loss. Unless otherwise specified, all data obtained are measured in a closed configuration with a coupling disc onto a HA-1 coupler (ANSI-S3.7-1995) or an occluded ear simulator (EN 60711, coupling arrangement according to fig. 4 in the test standard), and in the Phonak Target measurement settings.

Warning to hearing care professionals:

This hearing instrument has an output sound pressure level that can exceed 132 dB SPL. Special care should be taken when fitting this instrument as there is a risk of impairing the residual hearing of the user.

Using pure tone measurements with a digital hearing instrument can result in a wavy frequency response. This is an artifact resulting from the use of a narrowband input signal and does not affect the actual performance with naturally occurring broadband input signals.
