

Phonak Virto Q

Invisibility to explore life's rich soundscapes with confidence

Interact • We believe every voice is important. Voices are our connection to the world and allow us to interact with loved ones, friends and the people around us. The clearer we hear, the more we can make ourselves heard.

Your voice matters

We have been listening to ensure we fully understand what matters to you.* Each new generation of hearing aids is based on these insights.

We are proud to present our range of custom made products, Phonak Virto Q.

With the perfect balance between performance and cosmetic appeal these products range from small to invisible, suiting your individual lifestyle and hearing needs.

Custom crafted for your life and your soundscape

Wherever you go, whatever you do, you expect to be able to hear and understand with confidence.

We do everything to fulfill your expectations to not only hear but also understand better in every situation, no matter how challenging.

Our Phonak Virto Q custom products are individually crafted to your own ear canal to fit perfectly and comfortable in your ears.

With Virto Q you benefit from the broadest selection of unique features on the inside, with the highest degree of discretion on the outside.

Understanding everywhere

Phonak Virto Q helps you master even the toughest listening environments.

Capturing voices in both ears

Our unique Binaural VoiceStream Technology™ detects the speech signal and ensures that you can hear it clearly in both ears. This means that you understand more in more listening situations.

Speech in Wind – enjoy conversations even on a windy day

When wearing hearing aids, wind noise interferes with speech understanding and listening comfort. With Speech in Wind, Virto Q enhances your ability to understand speech well even when the wind is blowing.¹

auto StereoZoom – extracts the single voice you want to hear from a noisy crowd

When noise reaches a level that makes understanding one person in a crowd difficult, auto StereoZoom is automatically activated, allowing you to focus on the voice you want to hear.²

DuoPhone – makes understanding on the phone easy

As soon as you hold the phone to your ear, the caller's voice is automatically streamed to the other ear. Hearing the conversation in both ears results in superior sound quality and improved understanding.³

¹ Hearing Center Oldenburg (September 2013), Speech in Wind – the speech intelligibility can be improved with the novel binaural algorithm "Speech in Wind".

² Phonak Field Study News (April 2011), StereoZoom: Improved speech understanding even with open fittings.

³ Phonak Field Study News (February 2010), DuoPhone: Easier telephone conversations with both ears.

Understanding everything

Enjoying laughter, children's voices or the subtle sounds of rustling leaves under your feet enriches your hearing world. Hearing the nuances of life's soundscapes is part of the joy in rediscovering the pleasures of good hearing.

Phonak Virto Q has unique and proven technologies that will exceed your expectations.

SoundRecover – lets you hear and understand new things everyday

Makes high-pitched sounds such as birds singing, crickets chirping and the ring of a doorbell audible again.

UltraZoom – lets you enjoy every part of the conversation

Enjoy a lively conversation while noise from the side and back fades into the background.

Understanding with comfort

We know that engaging in conversations wherever you are is a top priority, hearing comfort however is just as important.

Phonak Virto Q comes with a host of comfort features that can be set to your individual needs. They effectively eliminate uncomfortable and unwanted sounds whenever they occur.

NoiseBlock – for more comfort in noise

Reduces uncomfortable background noise such as traffic or the constant hum of a ceiling fan without affecting your ability to understand.

SoundRelax – for a more relaxing experience

Softens sudden loud sounds such as slamming doors or clanking dishes.

WhistleBlock – for an overall pleasant listening experience

Eliminates whistling so you can relax and enjoy better hearing.

Designed to suit you – From small to invisible

For 60 years we have been at the industry's forefront to develop the perfect balance between high-performing technology and the most discreet designs. Precision and miniaturization have led to products that will not only let you understand better but do so with confidence.

Phonak Virto Q-nano – Truly invisible

The Phonak Virto Q-nano is the industry's smallest ever custom hearing aid that gives full confidence by being truly invisible. These aids provide superior comfort and discretion with a host of unique features for an extraordinary hearing experience. Its MiniControl allows for easy volume or program selection.

Boost the performance of your hearing aids

Modern hearing aid technology makes hearing and understanding more enjoyable. However, there are still times when an extra boost can be useful.

That's where the Phonak Wireless Communication Portfolio comes in.

Roger Pen and Roger Clip-On Mic – these wireless microphones reduce loud background noise and transfer the clear sound of the voice you want to hear directly to your hearing aids.

Phonak DECT CP1 cordless phone – looks like a regular phone, but is actually much more powerful, transmitting sound to both hearing aids simultaneously, reducing noise and maximizing understanding.

Phonak ComPilot and RemoteMic – allows you to enjoy cell phone calls and high clarity multimedia audio. Add Phonak RemoteMic to enhance one-to-one conversations over distance.

Phonak TVLink S – turns your Phonak hearing aids into a wireless TV headset with stereo sound quality.

You'll be amazed how much more you can hear in challenging situations.

Request the best

Phonak Virto Q comes in a variety of styles and performance levels. It is also compatible with our Phonak Wireless Communication Portfolio. So together with your hearing care professional you can choose the best solution to match your lifestyle and degree of hearing loss.

Life is on

We are sensitive to the needs of everyone who depends on our knowledge, ideas and care. And by creatively challenging the limits of technology, we develop innovations that help people hear, understand and experience more of life's rich soundscapes.

Interact freely. Communicate with confidence.
Live without limit. Life is on.
