

For a child to fully participate and get the most from school, their hearing system should be working properly.

## Listening check

- 1. Listen to the hearing aid. If it is not working, follow the troubleshooting steps below.
- 2. If the hearing aid is working, ensure it is in the correct Roger program.
- 3. Turn on the Roger microphone. You should hear your voice clearly through the hearing aid.

## Troubleshooting guide

Issue	Solution
No sound from the hearing aid	• Try a fresh hearing aid battery (remove the protective tab on the battery and wait 2 minutes before placing in the battery door).
	<ul><li>Is the tubing cracked or the earmold blocked with moisture/debris/wax?</li></ul>
	<ul> <li>Pull the earmold tubing off the ear hook. Does the sound come out now?</li> </ul>
	If so, there is a blockage in the earmold or a tear in the tube.
Roger microphone is not heard through	Make sure microphone is on and not muted.
the hearing aid	Tap or click Connect on the Roger microphone.
	- Hold microphone within 4" (10 cm) from receiver.
	<ul> <li>Tap or press Check to confirm network connection.</li> </ul>
	<ul> <li>Roger X usage- reattach audio shoe and Roger X to hearing aid.</li> </ul>
	- Remove any stickers, dirt or debris on contacts.
	Try a fresh hearing aid battery.
	<ul> <li>Check if the hearing aid is set to correct program.</li> </ul>

Should any of the above steps not resolve the problem, please contact your technician for assistance.
