
Life is on

We are sensitive to the needs of everyone who depends on our knowledge, ideas and care. And by creatively challenging the limits of technology, we develop innovations that help people hear, understand and experience more of life's rich soundscapes.

Interact freely. Communicate with confidence.
Live without limit. Life is on.

life is on

Connect • Capturing voices at the source means superior understanding and easy connectivity to a choice of technologies whenever you need it.

Capturing voices at the source

We have been listening to ensure we fully understand what matters to you. Each new generation of products is based on these insights.

This understanding inspired a range of accessories that capture the voices you want and need to understand. Watching TV and listening to music become more pleasurable, hands-free use of the phone a delight.

We are happy to present our enhanced range of highly effective communication devices – The Phonak AccessLine.

Conversations with a loved one
| Family reunions | Understanding
on the telephone | Dinner at your
favorite restaurant | Driving in
the car | Enjoying the outdoors
| Listening to music | Business
meetings | Group gatherings |
Places of worship | Watching
television

Phonak ComPilot – Your gateway to communication

Hands-free

Phonak ComPilot wirelessly connects your hearing aids to your telephone, MP3 players and many other Bluetooth devices. It captures sound at its source and transfers it directly to your hearing aids in stereo sound quality.

Complete control

With ComPilot you have complete control. At the touch of a button you can easily answer a phone call, or change your hearing aids volume and program settings without the need to touch your phone or hearing aids.

VoiceAlerts

Spoken alerts will help you identify the ComPilot status such as which device you are connected to, as well as telling you the name of the caller when the phone rings.

Phonak TVLink S – Closer to the action

Combined, the ComPilot and Phonak TVLink S will directly transmit your favorite television program to your hearing aids in stereo sound quality.

The ComPilot volume control allows you to listen in comfort without affecting the volume for other people enjoying the same program.

Plus, the one-step setup allows you to easily install the system at home within 60 seconds.

Phonak RemoteMic – Don't miss a word

Enjoying and understanding a one-on-one conversation in a very noisy environment can be enhanced by picking up the voice at its source. The discreet and lightweight wireless microphone combined with your ComPilot transfers your conversation partner's voice directly to your hearing aids over a distance of up to 20 meters.

Phonak PilotOne – Discreet confidence

This remote puts the control of your hearing aids at your fingertips. It allows for easy volume and program selection.

Request the best

Phonak AccessLine products connect you to the voices and sounds you want and need to hear and understand. Together with your hearing care professional you can choose the best solution to match your lifestyle and needs.
