

Serenity Choice™

Protecting hearing while allowing the ear to breathe and outperforming with regards to sound quality¹

Protects hearing against damaging noise

Outperformed competitors with music sound quality

Shown to allow the ear to breathe

Many people are exposed to damaging levels of noise

around **70%** currently don't wear hearing protection²

Case study of Swedish Armed Forces³

Rigorous implementation of a hearing conservation programme was undertaken in 2002, the impact was assessed after a few years.

Results showed that the incidence of hearing loss in the affected population

↓ **dropped to one third** during a five-year period

↓ having **reduced to 2.3%** from the earlier 7.9%

Prevention of hearing damage is the top motivator for wearing hearing protection⁴

Other top ten motivators:

- ▶ Perfect fit
- ▶ Keeps relevant sound and speech
- ▶ Best music quality at safe listening levels
- ▶ Lets the ear breathe

Serenity Choice™ products tick all the boxes

✓ Prevention of hearing damage

Certified and protect against hearing damage, by attenuating noise and loud sounds.

✓ Aim for the perfect fit

Four different ear tip sizes or can be custom-made. Various form factors and materials available.

✓ Keep relevant sound and speech

Where relevant, Serenity Choice filters attenuate across all frequencies, not just the high frequencies.

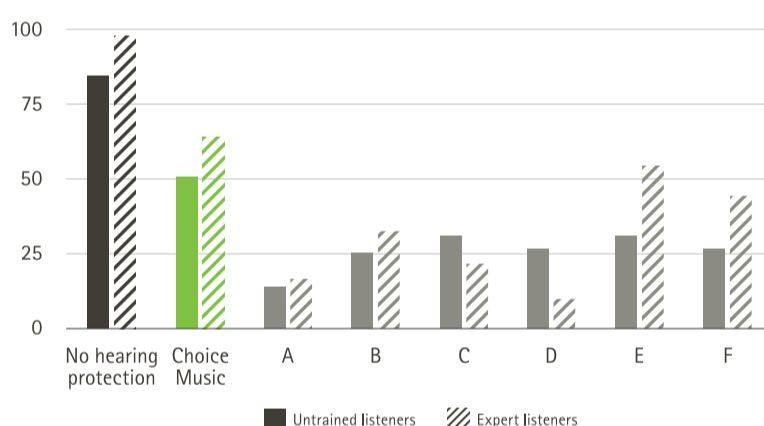

Outperformed with regards to music quality

A subjective sound quality study was conducted using Serenity Choice Music and six competitor products. A MUSHRA tool was used for participants to listen and rate all of the recordings (blindly).

Survey participants:

37 untrained listeners

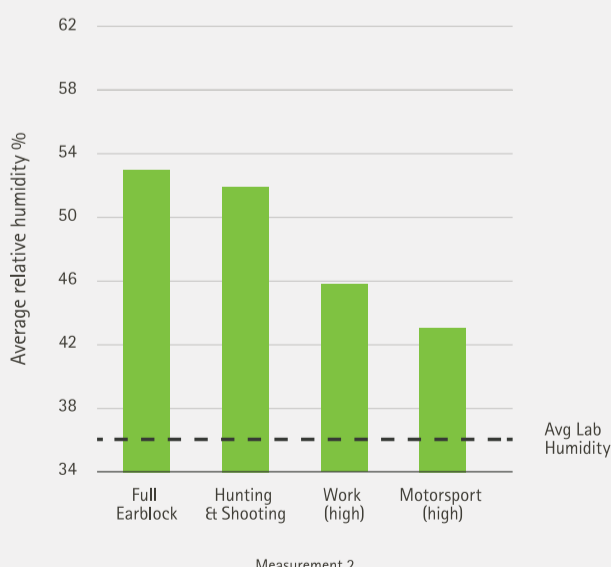

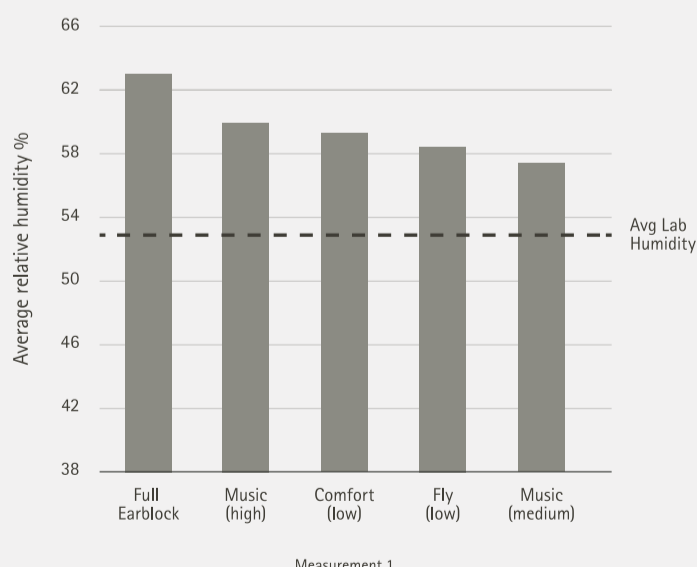

27 expert listeners

Serenity Choice Music outperformed all the competitor devices.

Lets the ear breathe

- A humidity measurement device was inserted into the ear
- Different filters were inserted into the device and the relevant humidity was recorded
- Two measurements were done under different lab conditions

All Serenity Choice™ products with filters result in lower humidity levels than when a full earblock is used
