

# Roger™ – your preschooler's new best friend

## More words

Did you know that your child needs to hear 45 million words to be ready for school?<sup>1</sup> A remote microphone system can expose your preschooler to up to 11 more words per minute... that's approximately 5,300 extra words per day!<sup>\*2</sup>

\*Compared to using hearing aids alone. Based on average hearing aid use time of an 8 hour day.

## More conversations

Once mobile, access to speech coming from a distance is more challenging. When using the Roger system, parents **speak more** to their children **from a distance**.<sup>3</sup>

## More responsiveness

Based on parent responses to the FM Listening Evaluation Questionnaire, while using the Roger system...

**80%**  
of families report  
**greater responsiveness**

**35%**  
report **less frustration**  
in their children<sup>3</sup>
